

# DeVorm

# From bottle to chair

In our design and production processes, we are always looking at where environmental thinking and economic improvement intersect — resulting in minimal waste in every aspect. The way we utilize PET Technology, emphasizes this vision.

## **PET Technology**

Simple solutions, smart production innovations and unconventional material choices that may seem simple at first sight, can drastically improve the effect on the further lifecycle of the product and its environment. This asks for an approach that goes beyond the paths we already know.

It is a soft, though strong material that is durable and has a great acoustic performance. PET Felt is both recycled as well as recyclable itself. The design of the Nook Lounge Chair allows a number of production steps to be reduced to one smart 3D pressing technique.

We believe PET Technology is one of the answers to ecological sustainability and environmental quality requirements in contemporary interior design.

## PET Felt Colour Blends

PET Felt is made from recycled PET bottles which are turned into a soft, yet strong felt material that is durable and has a great acoustic performance. PET Felt is both recycled as well as recyclable itself. Available in eleven unique colour blends.

Because PET Felt is made of recycled material, different products may have different outcomes in the colour blend.

# Big

# Modular Table System

A table system characterized by its versatility. Its modularity enables you to design tables for a broad range of applications such as workstations or conference, canteen and boardroom tables. One of the core features of the Big is its ability to span large lengths on just 4 legs. Choose from infinite surface, colour, shape and size variations to make the perfect table for any context.

# Big Round

# Modular Table System

Our Big collection has a new member with a round shape: the Big Round. Circular tables invite a sense of equality. They divide people and space in an equal ratio. A friendly way to be seated, as formal or informal as you wish. Just like the rest of our Big Collection, the Big Round is also highly customizable. Choose the surface, colour, shape and size to make this the perfect table for any context.

# Pod

# Privacy Chair

A privacy chair for break out areas in offices or residential projects. PET Felt has its own characteristic aesthetic as well as sound dampening properties to increase the sensation of privacy within large or crowded spaces.

# Hale

# Stack Chair

An innovative outcome, grafted on the foundation that several credible designers laid for the classic school chair. Designed by Ivan Kasner and De Vorm, the Hale Chair is characterized by its no nonsense; appropriate in every area and practical due to its stackability.

Utilizing our innovating pressing technique enables us to create a spacious seating and back. The curve of the seating is identical to our well-known LJ Series. Discover the high level of comfort!

# AK

# Series

AK 1,3,4 Design by De Vorm  
AK 2 Design by Ivan Kasner + Uli Budde

The AK Series consists of four multifunctional work space dividers, each with its own manifestation. The shapes shield users from their environment, offer great sound dampening properties and enable one to work in a relaxed and concentrated manner.

# LJ

# Series

The seat of the LJ Series is made from recycled PET bottles, the design of the seat brings back many traditional production steps to one smart 3D pressing technique. PET Felt is recycled, recyclable and offers sound dampening properties and great comfort.

# Nook

# Lounge Chair

Nook is designed as a comfortable lounge chair for hotel lobbies, break out areas or waiting areas. With 10 PET colour blends to choose from the Nook Lounge Chair is fully customizable to fit your project. The seat offers great comfort and can be upholstered with the fabric of your choice.

# Working without Hierarchy

Architect  
LXSY Architekten

Client  
FULL NODE

Photographer  
Anne Deppe

Location  
Berlin Kreuzberg,  
Germany

FULL NODE is a collaborative work space for innovative blockchain companies. This community believes information should be shared, continually reconciled and truly public. Reflecting this philosophy, LXSY Architects designed a non-hierarchical work space that lets everyone easily connect, share information, exchange ideas and closely collaborate. De Vorm's LJ's, Nook's and Wood Me Chairs support this open minded concept and allows for the different spatial functions whether it be for business or pleasure.

# Arnhem

## Sofa + Loveseeat

The modular Arnhem Sofa is designed to be multifunctional and converted in any look. With four different heights and fully upholstered reversible cushions, the Arnhem Sofa enables a broad range of applications.

# A new way of Working

Architect  
Alexander Fehre

Photographer  
Zoey Braun

Client  
Bosch AS

Location  
Schwäbisch Gmünd,  
Germany

In order to develop its automotive innovations, Bosch is empowering people to work where, when and how they choose. This new 'agile' work practice requires new work spaces. Studio Alexander Fehre met these design demands. The result is a striking, flexible and future-proof work environment. A blend of work and play, where the Nook, Arnhem Sofa, LJ Series and Big Tables create eye-catching and functional spaces.

# Musette

# Side Tables

The unique design of the Musette Series is inspired by oriental coffee tables. The Musette is available as a side table and a coffee table.

# Upside Down

# Couch + Island

The Upside Down holds a rotatable armrest. The upper side is soft and can be used as head support. When the armrest is turned upside down an upholstered table appears.

# LW

# Series

The design of the LW Series was inspired by vintage industrial lamps. To give the lamps a surprising touch they are made out of soft rubber. Through dip moulding, the lamps have a flexible yet sturdy structure.

# Wood Me

# Series

The Wood Me Series is a duo of refined and solid chairs, made from the best European oak: the Wood Me Chair and the Wood Me Lounge Chair. The chairs are handcrafted, steam-bent, sturdy and strong.

The Wood Me Series are handcrafted pieces with beautiful detailing. Combining traditional craftsmanship with modern materials and innovative production methods. Creating a timeless piece with a variety of bespoke options.

# Radial

# PET Felt Pendant

The design of the Radial lamp was inspired by 3D puzzles from our youth. All elements are cut from a PET Felt panel and puzzled into this lamp. PET Felt panels enables us to create countless 3D models and applications using this technique. The Radial lamps are constructed with an ABS fluorescent holder and a Philips ProCore 1500 mm LED TL.

# MG

# Series

The serving character of these tables offers a solution to every area, big or small. The small MG 1 can be fitted in between the cushions of our Arnhem Sofa to be used as a little work space or coffee table, whilst the big MG 3 turns any Arnhem Sofa into an office area.

# Florian

# Series

Its playful lines combined with minimal design gives it a sympathetic and playful appearance. The Florian Series have been purchased by the Stedelijk Museum in Amsterdam for its collection.
